TRAKKA

trakkaway 850

trakkaway 850

Since 1973 Trakka have been dedicated to leading the Australian motorhome industry with continual innovation and development. Our numerous Awards of Excellence are testament to this commitment to deliver THE best design, technologies, quality and value in the Trakkaway.

Our passion to build the best motorhome has come together in the superb Trakkaway 850 - not too big to drive, not too small to go without. Trakkaway 850 has been cleverly designed to include the important wants and needs of the discerning Australian traveller ... Trakkaway 850 has it all.

Kitchen Sensations Situated conveniently between the living area and the bedroom the ergonomically designed L-shaped galley contains a contemporary stainless steel cooktop and oven, rangehood, microwave oven, home-size fridge/freezer and water filtration system. Craftsmen built with eye-pleasing curves in HP Euro-ply, there are high quality Innotech drawers for easy storage and a convenient slide-out pantry to please the chef.

Advanced Monitoring To easily manage the sophisticated electrical, plumbing and lighting systems Trakka have designed an intelligent Electronic Monitoring Panel - at the touch of a button you have battery and watertank levels, air temperature and also controls for component switching. Throughout there are numerous dimmable LED lights, a complete solar charging system and a tidy 240V lead locker. For complete living comfort there is ducted airconditioning and ducted diesel heating.

Water Wonders Keeping in mind the importance of weight distribution and tank capacity we've balanced perfectly the positioning and size of fresh and grey watertanks. Water is fed to the internal and external showers, the vanity and kitchen sinks and includes an efficient water heating system. By cleverly designing the shower and the toilet opposite each other in the stateroom ensuite there is more room for showering and the toilet and vanity remain comfortably dry.

Superb Stateroom Trakka have designed an extra-long island queen bed for easy access from either side of the bed (alternatively twin singles). The all-round double glazed windows provide a wonderful light and spacious feel with blinds for privacy and a pleated divider to separate the bedroom/ensuite from the living area. For useful storage there are large twin wardrobes, handy sets of Innotech drawers and a massive partitioned space under the bed that can accommodate bulky belongings. Trakka include another HDD TV/DVD for the convenience of watching TV in bed.

Fine Dining By rotating the comfortable luxury leather cab seats to face two chic side lounges we've created a relaxing and stylish lounge and with the addition of the multi-position table a spacious dining area. So you can safely travel with four people two additional ADR approved seating positions are located just behind the cab seats. To take in the scenery the living "room" is surrounded by double-glazed, screened, opening windows with a smart blind system for privacy. The HDD TV/DVD is located for ideal viewing and the position is adjustable. Above is a spacious additional double bed or a space for extra storage.

NIGHT

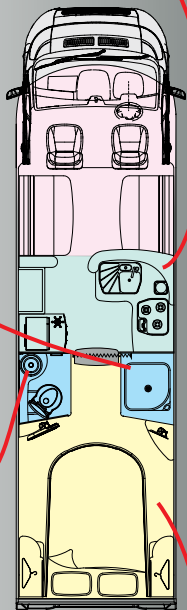

Functional gourmet kitchen

Spacious separate shower

Well designed separate vanity

Twin bed option

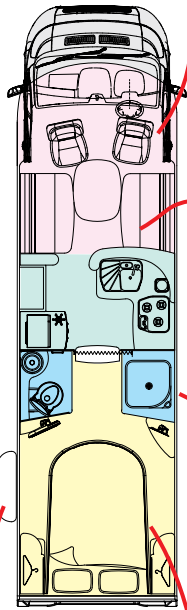

Luxurious queen size bed

DAY

Roomy and relaxing lounge room

Convenient central door to living quarters

240V lead locker

Handy outdoor BBQ

Higher load carrying capacity tandem axles

Massive versatile storage under rear bed

Power, Performance, Safety The new generation Fiat Ducato 3.0L Multijet turbo diesel engine offers outstanding torque values ensuring superior pickup, responsiveness and fuel efficiency.

The newly designed 6 speed COMFORT-MATIC transmission has been fine-tuned for optimized performance in a motorhome. The cab offers car-like comfort with ergonomically designed driver position and superb visibility along with a high priority on safety.

Superior Engineering Trakka insist on the best, so we selected the awarded Fiat Ducato with a tandem-axle AL-KO chassis designed in Europe especially to become a motorhome. With this combination our experienced designers have a much bigger internal volume to build the living quarters. Features of the chassis are it's lighter weight for greater loading capacity, independent suspension for better ride comfort, lower floor for easier access and a wider track for improved stability and road holding. Trakkaway 850 is sensational to drive!

Aerodynamic Body Design State-of-the-art technology is used to build the fiberglass-Styrofoam- fiberglass wall panels for the ultimate in strength, hi-gloss finish, insulation and all important weight reduction for higher load carrying capacity. Structural integrity and water tightness are retained by not compromising the panel with large cutouts; our designers are skilled in creating a spacious lounge, kitchen, bedroom and ensuite without slide-outs in this ingenious motorhome.

Luxury Inclusions We incorporate numerous special features such as luxury leather, fabrics and carpet, stainless steel BBQ, large motorized skylights, titanium side awning and the latest system for entertainment and navigation as standard. We invite you to make comparisons and see the difference in Trakka quality, attention to detail and proven resale values.

Trakkaway 850 is your motor home away from home.
