# ELECTRIC BEDS FOR SWITCHED-ON TRAVELLERS

*By remote control the yin-yang single beds of the Trakka Jabiru and Jabiru Xtra become a king!*

The days of back-breaking bed making are over, thanks to yet another Trakka innovation: the remote-controlled **Motorised Bed Combination** – or **MBC**.

Featured in all new Trakkas for 2007, the **MBC** uses electric actuators to do all the hard work.

Whether it's converting the dinette of the standard **Torino** into a comfortable double bed, or the yin-yang single beds (a registered design) of the **Jabiru** range into a generous king-size; a touch of the remote control is all that's required.

The **Torino Xtra** takes a different approach. The permanent rear bed can be raised for bulky storage, such as folding bikes, golf clubs & buggies or an outboard motor.

*The permanent rear bed of the **Trakka Torino Xtra** can be raised for even more storage.*

“The **Motorised Bed Combination** is a practical and easy way to make the most of the diverse sleeping arrangements available in our new range of motorhomes” said Trakka's Managing Director, Dave Berry. “Thanks to pushbutton remote control, bed making couldn't be easier.”
