

## **Trakka's NEW Trakkadu DSG Auto combines luxury with practicality**

The superb design and quality of Trakka recreational vehicles has been amalgamated with the latest incarnation of VW's iconic Transporter range to provide the ultimate solution for combining a holiday with practical transport for the family throughout the week.

The Queensland Caravan & Camping Show at the RNA Showground Brisbane from 9<sup>th</sup> to 15<sup>th</sup> June will see an unveiling of the latest addition to the Trakka family in the form of the new Trakkadu DSG Auto. Trakka's camper conversion is once again the perfect match for VW's tried and tested quality build and design. A new driveline, as well as updated exterior styling, cement the Trakkadu's reputation as the compact practical campervan built for Australian conditions.

The new Trakkadu DSG utilises the latest Webasto diesel system to power the stove with an ultra-modern CERAN cooking surface which offers the convenience of single fuel within the campervan with the option of diesel ducted room heating.

The Trakkadu DSG includes many standard features such as swivelling front seats and multi-position fold-out table providing ample dining space for four persons, stainless steel sink, pressurised water system, stylish storage cabinets with convenient roller doors along with an efficient 80 litre fridge with freezer. There is a rear multi-position sliding seat that folds simply to create a comfortable double bed with handy boot storage and drawer under.

The new Trakkadu DSG Auto's low profile, gas assisted elevating roof gives a massive amount of space inside along with fantastic ventilation with an integrated premium Titanium awning for additional weather protection.

Highlighting the latest technology advances in the Trakkadu DSG is an innovative electronic control panel, which monitors the batteries' condition, fresh and grey water tank levels and gives outside temperature readings. Trakka utilises LED lights inside the vehicle to keep power use to a minimum.

Best described as the luxurious camp site on wheels, the new Trakkadu DSG provides the type of handling and driveability of most modern-day cars. VW's latest bi-turbocharger four-cylinder diesel offering is not only more powerful than its predecessor with 132kW, it also provides better fuel efficiency. In addition to this the advanced 7-speed DSG gearbox, which can be driven in automatic or manual mode, transmits the tremendous 400Nm of torque to the front wheels in a smooth and precise manner.

Power mirrors and windows, cruise control as well as a multi-function steering wheel and trip computer make driving the Trakkadu a pleasurable experience. Rounding off the features list are ABS, ESP, dual airbags, air-conditioning, CD player, remote central locking as well as front fog lights with cornering function, rain sensing windscreen wipers and auto headlight function.

There is a vast array of options to choose from such as a diesel room heater, roof bed, rear shower, solar power, HD TV with DVD, alloy wheels and satellite navigation.

The Trakkadu DSG will be available in 4Motion AWD shortly with forward orders being taken now.

**Trakka is Australia's leading manufacturer of your motor home away from home.**
